PORTLAND, SATURDAY, MARCH 6, 1886

AN INEXORABLE LOGIC.

Prices of most things on this coast have always been high. It has been as true of the in-come expected from money and property as of the profits of trude and the wages of labor. Fine produce of the soil has been during recent years, an exception to the rule; so that i is doubtful now whether in any other part of the united States the stude articles of food-modity. United States the staple articles of food-paritymarly bread, fruits and vegetable products—are as cheap as here. Nowhere else can excellent flour be longist for \$4 per bastel. Vestorish a farmer who lives six unless out of Portland was delivering pointoes in the city for 30 cents per sack of two bushels each. "At this rate," said he, "what do yet suppose a farmer can afford to they for labor to clear be less to great a result. pay for labor to clear his land, or even to cill. pleid to the depression of values, though ner-chandise in all lines has been rapidly following. Battes of interest, too, are coming down, and so are wages. The pressore is presistible, and the result inevitable. Yet in the habite of he country, acquired in or inherited from the gold period, there is steady resistance to the process reduction. There are men who still think ther ought to have the old income from invest ments of capital, and others who still think they ought to have the old wages for hiller tends powerfully to a paralysis of business and industry. The result is unemployed capital

The Chinese on this coast have been furnish-ing a considerable supply of labor that has caused many persons to venture upon expendi-tures or investments in which latter is employed. This has greatly stimulated the Industry of the country. But at this point the cry is raised that the Chinese are working too cheep, though they are not working as cheap as white people is the eastern states work in studies amployments. It is assumed, however, that if the Chinese are driven out employers will be forced to una white persons higher wages. But there never was a greater mistake. Our manufactured goods will all be brought from the East. The time never before was so short nor freights so low. If we are to have any development of industry here the wages of labor and the profits of capital must both come down to the easiern basis, and if wages are held above the eastern hasis capital will remain idle, for it can always wait.

Western Oregon and Western Washington

are largely covered with forests. In the work of clearing away these forests a beginning has been made, which has been mided largely by Chinese labor. Now it is said that the labor of Chinese is not at all essential to this, since Penn sylvania, Ohio and Kentucky had quite as heavy forcete as those of Oregon, which were clear off without the aid of a single Chinaman. P orth as argument, this is as pitiful as the aver age babble of the modern sand-lotter. Pot the labor that cleared the lands of the older hired out to work in those days they receited from seven to ten dollars a month, and they did fathful work. Many new in Oregon whose rounger days who passed as "hired hands" in those states, can bear witness to the conditions under which the lands of Missouri, Indiana and southern Illinois were cleared and brought into cultivation. It was done with the channest of cheap labor, the most patient of patient labor, the most faithful of faithful labor. In none of these qualities can even (binese later bere Begin to compare with the abor that subdued the wilderness in the great states beyond the mountains. Our fathere and grandfathers took hold of the work with their own hands, as many of ourse res did in early days in thregon, and many are doing now. To establish homes was and is the idea of such work as this. Gain computation in money can have no place in it. Reckoned so, the picneer could not count 25 cents a day. The "bired man" of those times would be regarded by the so-called champions of labor now as beneath the Chinaman, and yet the hired man of those times soon reached the mank of a cilizen of property and character. He did it by attending faithfully to his employments and obligations, letting the liquor shops alone and having no time to spend in Hetening to the rascale of blatant oratory and bogus jour-

nalism, had these peats then existed.

Many of our settlers are still clearing and cultivating their own lands, and some of them would be able to employ help at wages propor tioned to the value of their land and the price of its produce; but it is notorious that the number of white laborers who will work steadily and faithfully as laborers were wont to do in other imes is extremely small here, and moreover that the wages demanded utterly forbid their employment to any considerable extent in clear-ing off the forests and cultivating the soft, Hence Chinese have been employed quite largely n this work during the last two years. The consequence has been the opening to cultiva-tion of large tracts of land covered by the prim-eval forests. If white men could be hired to clear our lands at the wages paid for clearing the lands in the older states this important work would go on here rapidly; but they cannot be hired for less than three times the wages paid for that work in three states, and land here and the produce of it are alike as cheap as they were in those states in those arig dage. If has been found by experience to be barely practicable to clear lands here with I have a labor, and the only result of expulsion of these workers will be the stoppage of work of this soit, expect such as the sowner of the lend u as be able to decline eff, or accoptance by white laborers of as low mages for it as have been pade in other states in the like our physicant. We are far from saying feat white men could to be willing to accept to these rede and heavy cuspics us as a low wager as are a code top Chinese. That may depend on effectionalities, if they can do better they ought to on it. But it would be fair better from them to work for weges at which the country can afford to pay than to be libers and indicated in the pay than to be willing to do the indead of the pay. rough work of the country at wages which con-pleyers can afford to pay, the Chinese who do it are not only not in their way, but by the results of their labor furnish employment to white men in their aport varies employment to white men in more advanced dides of industry. To drive the Chinese out of our woods of set of our fish park-ing establishments not only will not make places for white men at letter wages, i. it will out many whites out of employment. There is provided it in the shatting down of the conproofsel it in the shatting down of the cord mines and the abandonment of the hop deals at Pogeteound. The Observats forefold this when the consade open the Unions there began menths age. It has happened already. No country yet ever failed to reap the pounity, in stegnation of business and industry, of the expusion of productive laboratron it. The logic of this kind of thing is inexamble. It cares for no man's opinions and hears no appears.

It was stated carelessly in THE ORIGINAL of resterday that the question of prohibition would be voted on at the next general election. It was intended to be said that prohibition would be an important issue in the election and that the action of many voters would be based chiefly upon this issue. The question will come up in this way: The advocates of prohibition hope to secure their object by the addition of a prohibitory clause to the state constitution, and this can be secured only in one way. An amondment to the constitution must be proposed in the legislature, and if agreed to by a majority of the secure of vote, be referred to the legislature to be chosen at the next general election following, and if again approved, submitted to the electors of the state at the next ensuing general election. Now state at the next ensuing general election. Now the legislature at its last regular session passed a probibitory amendment through its first stage, and it will come before the next legislature, to be chosen in June, for permission to be submitted to the people. Throse who favor prohibition desire, naturally, that men should be elected to the legislature who will rote to submit the amendment, and in this way the question is likely to be an important issue in the cameraion.

Citizens of Brownstille, Linn county, are moving in the matter of co-operative dairying. It is proposed to mise a sum of a few hundred dollars as a horus to give a man of experience who will establish a first-class creamery at that place. The best of pasturage and every facility for raising feed of all kinds for milch cows, together with the fact that a large number of these animals are owned in that vicinity renders the plan a feasible one. It an essay read some time ago before the Midneso a fairyman's asso-ciation the statement what ande and recurved the independent of the heat butter-makers in the state that the winter foot that imparted the finest flavor to butter in "a mpkine, claver may and cornstalka." Farmers of Linh county who propose to supply a met-class creamery with material that will enable at product to take first-class rank in the nabrket will find it neceseary to provide their coves with that it here-eary to provide their coves with proper food for this jurjoise. Turnips and carrots, much in favor with those who feed upors, because of the exceeding ears with which they are grown and the enormous yield per here, must give place to provender that will not make butter have the odor of vegetable some. Obegon will produce, with ordinary care, any sort of food that by experiment has been found to make a good qualand the clover lot will give two good grops each season. Carefully bree cows, well sheltered, regularly fed and utilized and humanoly reated will give to a creatipary undersat that can be depended upon as first-class. A husmess of this kind, intelligently managed will pay in this state, providing farmers in its vicinity assume their share of the freeponsibility in it by providing an ample supply of first-class stock.

A CREAMERY IN LINN COUNTY.

The lawyers of Scattle tool very keenly the discredit brought upon their profession by the contemptable and crimical course of teorige Venable Smith and Julius Stochester in the Chinese riots, and a few tays age a meeting was called to consider what measures about the taken to relieve the bar of the odinm of disreputable mombership. Mesers, M. E. Naught, Lewis, Jacobs, Burke, Munday and Medibay, all prominent lawyors, were appointed a committee to consider the matter and suggest a course of action. At a little meeting Thursday night this committee reported a recommen ka-tion to the territorial chief justice that the effenders be disparred for rinsons and solitions conduct, which was adopted by a two-thirds vote. The matter now goos before dustice Greene upon this exchangedation. These scrubs, who have no better business than to furnished discontent and riot, are not morally fit for nothing of the law and we have to see them. ment discontent and riot, are not morany in co-officers of the law, and we hope to see them thrust out in disgrace, blanded as traitors and

The Oregon City Enterprise, noting the burglary of a dwelling of one of the citizens of that place last Sunday night, says: "The critoinals were undoubledly residents of this town, who bebelieve that if the residence of one person can be broken open on one Sunday night and the owners thereof made to lave, that the property f another can be taken the next Sunday night. That is it, exactly. There is no distinction as to persons in the code of the freebootst. A man who will enter a China nan's house, rob his pockets and eject him will enter the house of his neighbor for the purpose o' glunder, merely using a little more steal habout it lest he might encounter resistance of a king that would re-

A Chicago paper notes the fact that there was very little intelligible cause for the late strike at McCormick's reaper works in that city and adds: "It is approved that the strike was not at all under the management of McCormick's for-ncer employes, but was engineered by a few outside agitators, who have never worked for Mc-Cornick, nor, so far as is known, for anybody else in an industrious and cred table way." If Portland agitators had sat for that picture it could not have represented them more faith-fully. So far as known, none of them have ever worked for themselves or others in an industrious, creditable way.

memory of the Cincinnati poster business of last fear, as it says: We do not want to be considered at all captions

We do not want to be considered, at all captions about the matter, but we do nost positively assert that it is time the poorly paid and hardly worked country printer was recognized; and we here assert that not a line shall be printed this yearst in the Reporter for the benefit of the State Agricultural anothery that is not properly ordered and paid for at current rates. And if our brothers of the pressibility and a similar proclamation they will do themselves simple justice, and sind off one of the most greedy legeles and springers that all face to contend with is

The McMineville Reporter says that "there never was a time in the history of Yambill county when money was so plenty as it is now. Every attorney in the county, besides the banks have been entrusted with coin to loun." Thus inaugurated by the hard times of the past few years, and of the acquisition, by immigration of teady, well-to-do settlers who see to it that their income each year is in excess of their outlay.

the distinction of being the only ferry on the river that aids the hawlers kign in its lawless

Work.

The Labor Question and Farmers

Whitever objection can be taken injuried the more labor there is no especial reas in for diving them and of Origina at this time. ### COMMERCIAL.

FRIDAY, Natch Overland receipts include 1 es eights, 1; bis 144 ex 40 caks 175 butts tobacco, 10 pig herring, 6 shs orn, 6 bbls molasses. Sies meal, 5 sks ruts, 5 bbls , 400 sks flour, 3 bas fruit, 24 green hides, 1

The currow gauge road announder a rate of \$2 per int on grain in carload lots to Por land from all points on the west side. This includes gleibvery in this city by the west side road. A steather rate of \$2.50 to Sun Francisco makes a 1-rough rate of \$4.50, the same as charged by the Yaqudia route. The former west side rate was \$2.60, which makes the decline to cats per for. Now, if there can be some such arrangement with up fright all things will be on an even footing. Possibly the Yaquma route will soon be heard from with segard to grain freights. PRODUCE RECEIPTS Past of Hours: \$54 cits

35. (cfrs ministin, 25. asa polacies, 45 asa fract. 12. fe lbs bides, 115 es eggs, 5 es batter, 15 bes fract. Also 6566 etla wheat 500 bids (borr. 200 etla milistuff. 12) lbs w.ml, 550 lbs hides. 125 gks. (laxseed, 20 calarrivals off coast. A number of Cultiornia and Oregon eargoes must be alimost out and will for a time make up the great bulk of Brills; imports, On inst Saturday there was 32 vessels on no ite from California that saited prior to December and 31 Oregon. December sailings from this coast numbered 41. American markets today are specially firm. The strength abroad has little effect here but II is believed that values may be sailed furner with a better consorting for securing extremes.

NEW YORK STOCK MARKET.

NEW YORK, March 5. Governments were dult and steady. Stocks were much less settle: Prices were feverish and tregular most of the lang, but especially so in the morning. Opening prices were from \( \frac{1}{2} \) to 5. higher, but there was an irregular upward movement, which continued, wit, mode rate reactions, until after 2 o'clock. Movements were considerated by outside rumors, and the market closed irregular and generally bear y.
